**Laser Plastic Welding Technology Showcasing at Assembly 2016**

Tualatin, OR, September 2016 — LPKF Laser & Electronics has announced it will exhibit at the 2016 Assembly Show in booth 1301, which will be held October 25-27 at the Donald E. Stephens Convention in Rosemont, IL. They will be showcasing their laser plastic welding technology, a process of bonding plastic using focused laser radiation.

LPKF is the industry leader for laser plastic welding solutions, with 15 years of experience and over 200 systems in serial production. While there are many methods for joining thermoplastics, laser plastic welding has a few clear advantages: higher joining quality, minimal resulting flash or particulates, higher quality controls, less stress to the component and the ability to weld complex and large parts.

To learn more, stop by the LPKF booth 1301 at the Assembly Show in Rosemont, IL October 25-27, or visit [www.lpkfusa.com](http://www.lpkfusa.com) for more information.
