LPKF to showcase Rapid Prototyping at EDI CON

Tualatin, Ore., August 2016 — Among the many technologies featured at the first ever EDI CON USA in Boston, MA this September, LPKF Laser & Electronics will be showcasing solutions for in-house rapid PCB prototyping. Today, more than ever, PCB prototyping is crucial to the electronic design process.

LPKF's family of rapid prototyping systems provides ideal R&D equipment for virtually any engineering environment. In-house prototyping equipment saves users a considerable amount of time as opposed to outsourced prototyping options, while also ensuring data design confidentiality. LPKF is the market leader in this area, with expertise in PCB milling dating back to 1976.

For more information on in-house PCB prototyping, visit LPKF in booth 511 at EDI CON USA in Boston, Mass. at the Hynes Convention Center September 20-22, or visit www.lpkfusa.com.
